

Hi,

I support SB 425: An Act Concerning Municipal Transparency, Efficiency, and Accountability.

Every town needs a "seeclifix" type service available through an app on a smartphone.

The wheel doesn't need to be reinvented by each local government. I testify that the app I use now works. When I use it, I can feel I'm doing something appropriate to support where I live. Better yet, I see results.

I hope you can make this type of service, which is basically a connection between individuals and local government that is mutually supportive, happen in more places across our great state.

Thank you,  
Jamie
